Gun Club 3 is a shooting game published by The Binary Mill. The background of the game is as the title says. They carry several shooting practices in an arms club. The binary mill was previously involved in the research and development of mobile games and has also produced many excellent game jobs, such as Mini Racing, Forest Home Out Now, and Firearms Club Series. Its game quality reflects high praise from critics. Most of its games use a rate system instead of free download, and Gun Club 3 is also the orthodox sequel to the series of land weapons clubs on the virtual reality platform. They target mainly gun collectors. The appearance and firing of weapons in Shi's voice game have been extremely restored. We don't think it's going to disappoint all the players. After aiming through the scope, we fired the gun. In video games so far, the weapon on the screen can point things away. However, the gun club 3 action shooting game introduced this time restores a real shooting sensation. In a suitable environment, you will shoot with a real perspective. In this game, players can get a shooting experience as if they were using a real weapon to shoot the target in front of them. In this game, players need to shoot targets that constantly appear in each level to defeat the level in this way. Players can use different weapons according to different levels. They can also strengthen their favorite weapons while perfecting their combat style. Although it sounds complicated, the whole game just tap the touchpad to complete all the operations in the game. The first is the basic level. As you design those static enemies, enemies are also replaced by cardboard. Your main task is to aim well and then shoot, which is very simple. However, there will be some hard-to-hit enemies in the next levels. You need to slide the touchpad so you can put the gun on the front. In this way, there is a needs to aim. If you encounter an enemy that isn't good enough to hit, put a gun like this, and you can shoot more easily. If you hit your head, you'll get bonus points for headshots, so aim and shoot! The trick to shoot at the head is to aim above the head and shoot. If you run out of bullets, you can ammo sliding on the touchpad. As in a normal shooting game, if we use the bullet up, it will be replaced automatically. Once the bullet is loaded, a white circular measurement slot will appear on the screen. If you successfully tap the green area to complete the reload, you'll get an extra reward. But even if it fails, you can complete the reload. This level needs to be used to re-assemble. By sliding the enemy into a distant window like this, he feels like a sniper. If you put the rifle in front of you like before and then look at it from range. It will also expand the field of view across range, and there will be some tremors, which also looks very realistic. Calm down and be calm. Although the image is small and difficult to distinguish, many enemies will also use hostages as shields. If you hit a hostage, some points will be deducted, so you must successfully avoid the hostages and shoot those inhuman enemies. If you use the rifle viewfinder to find the enemy, because the riflescope has an increase, the line of sight will become messy once it moves. Although a new enemy appears, there will be navigation directions in the direction that appears, and then if you follow the prompts to find that direction, you can also find the enemy, but it is best to look away from range and find the enemy. Aim later, to ensure the efficiency of the shot. We can roughly divide all levels into four categories. The first is the introduction. Just shoot the cardboard representing the enemy, and the cardboard will disappear after some time. We can defeat enemies in this level with a single hit, and you can earn points immediately, so calm down and shoot. Then there's the second guy. In this type of level, many enemies will appear at once. If you destroy these enemies, you can complete the level. Although very similar to previous levels of enemy cardboard, enemies in this level will move. Therefore, there is no time limit. The third level is for practice. You can use your favorite weapon to fire as much as you want, as well as newly earned weapons. In addition, you can practice shooting at this level. Finally, there's the fourth level. For the action shot, do you feel like there will be zombies in the scene? That's right! In this level, zombies will come to attack! Although it's still cardboard, there are low zombie roars all over the scene. And when you hear the sounds of zombies approaching, it still creates a little tension. And just like zombies in other games. Durability is very strong, and the powerful weapon needs to be fired many times to defeat a zombie. And even if the arms are blown, they won't die. But with one shot to the head, you can defeat a zombie in one hit because it takes time to load bullets. It's best to aim at your head and shoot as much as possible when you don't have accurate understanding of the weapon's firepower and the number of bullets. The most important point is that this level has a force value. Once attacked by a zombie, it will reduce the physical strength value. Once there is no physical strength, the game will be over. The weapons that can be used in the game are divided into approximately five types, each of which has its characteristics. We can buy new weapons in the store. The first guy's a gun. Although the power is relatively low, it can be very simple to shoot continuously, and the price is relatively low. At the beginning of the game, we used guns. Depending on the type, the number of ammunition loaded will decrease and the corresponding power will become stronger. The second type is a submachine gun. Load capacity and stability are relatively high, and continuous shooting is also relatively easy to control. There are also many types, and the price is slightly higher. The third guy is the shotgun. Power is too high because it's a plural blow. Therefore, if you can get a shot in the head, you can get a lot of shooting points on the head at once. But it takes a long time to play, and there's some difficulty getting started. The fourth guy is the assault rifle. The accuracy, number of pumps charged, pump speed and stability is relatively high, and firepower is not low. The only drawback is that the price is relatively high, and it is difficult to start in the early stages of the game. The last guy's the rifle. It cannot be used at normal levels, but we can only use it in rifle-only levels. And it's relatively difficult to use. It is characterized by the need to aim through a range. You can also upgrade the gun. The objects that can be improved are accuracy, number of bombs, power, charging speed and stability.iGun 2 Pro is an attractive free shooting game with over 30 million downloads worldwide. If you are a gun lover, with this game, you not only learn about them, but also admire the beautiful weapons. Shortly after the release of Shooting Showdown, an interesting target shooter in Windows 8, bringing a very interesting shooting simulation experience. iGun 2 Pro appeared on Windows 8 in an original style for conventional shooters.iGun 2 Pro possesses 20 weapons, but the developer promises a library of 200 guns waiting to be released.
